Silver Grey Indian Sandstone - Project Completed By Straw Landscaping

Riven Indian Sandstone

Sandstones are an excellent paving material formed millions of years ago from small size coloured grains of sand and quartz which are bound together with natural cements such as silica, and then compressed over time into the hard stone paving that we see today.

These 4 colours have a riven surface which is a tradtional surface for paving, giving it a classic look.

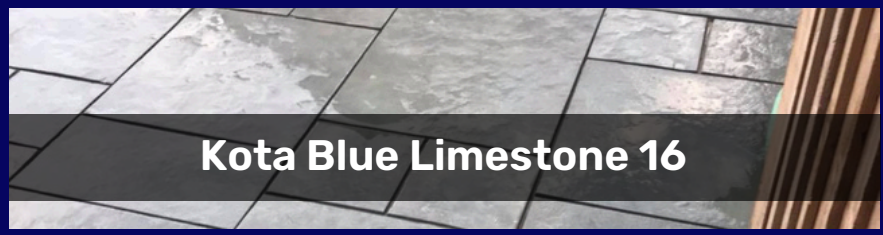

Fellside (Raj Green)

A beautiful top grade and extremely popular Indian Stone. Each paving stone is unique with differing riven profiles and tonal variations of greys and light browns.
This is a very appealing stone with all sides cut naturally with quarry fettled edges into uniform sizes for ease of laying, and creating a natural, hard wearing, and pleasing look to your garden.

Rustique (Sunset Buff)

A beautiful top grade natural stone paving slab, calibrated to 22mm thickness, for ease of laying, (also known as Indian stone paving slabs, or Sunset Buff), when only the best will do.
This is our most popular natural stone paving with tonal variations of warm buffs and greys with brown hues bringing subtle colouring and style to your garden.
All sides are cut naturally with quarry fettled edges into uniform sizes for ease of laying.

Silver Grey (Kandla Grey)

A beautiful top grade natural sandstone paving slab (also known as Indian stone paving slabs), when only the best will do. Each paving slab is unique with tonal variations of greys and silvers, with differing riven profiles.
All sides are cut naturally with quarry fettled edges into uniform sizes for ease of laying, and circles are also available which can either be incorporated in the patio squared off, or as a stand alone feature.

Rosemount (Modak)

A beautiful top grade natural stone paving slab (also known as Indian stone paving slabs) when only the best will do. Calibrated to 22mm thick for ease of laying, each paving slab is unique with tonal variations of warm reds, oranges and buffs on a differing riven profile. All sides are cut naturally with quarry fettled edges into uniform sizes for ease of laying.

Quartzina Limestone Paving

A beautiful top grade natural limestone paving slab when only the best will do. Each paving slab is unique with small tonal variations and a differing surface profile of black limestone.
All sides are machine cut smooth into uniform sizes for ease of laying.

Kota Blue Limestone

A beautiful top grade natural limestone paving slab when only the best will do. Each paving slab is unique with small tonal variations and a differing surface profile of steel blue limestone.
Similar to Silver Grey Sandstone but with a flatter surface.
All sides are machine cut smooth into uniform sizes for ease of laying.

Sawn & Honed Indian Sandstone Paving

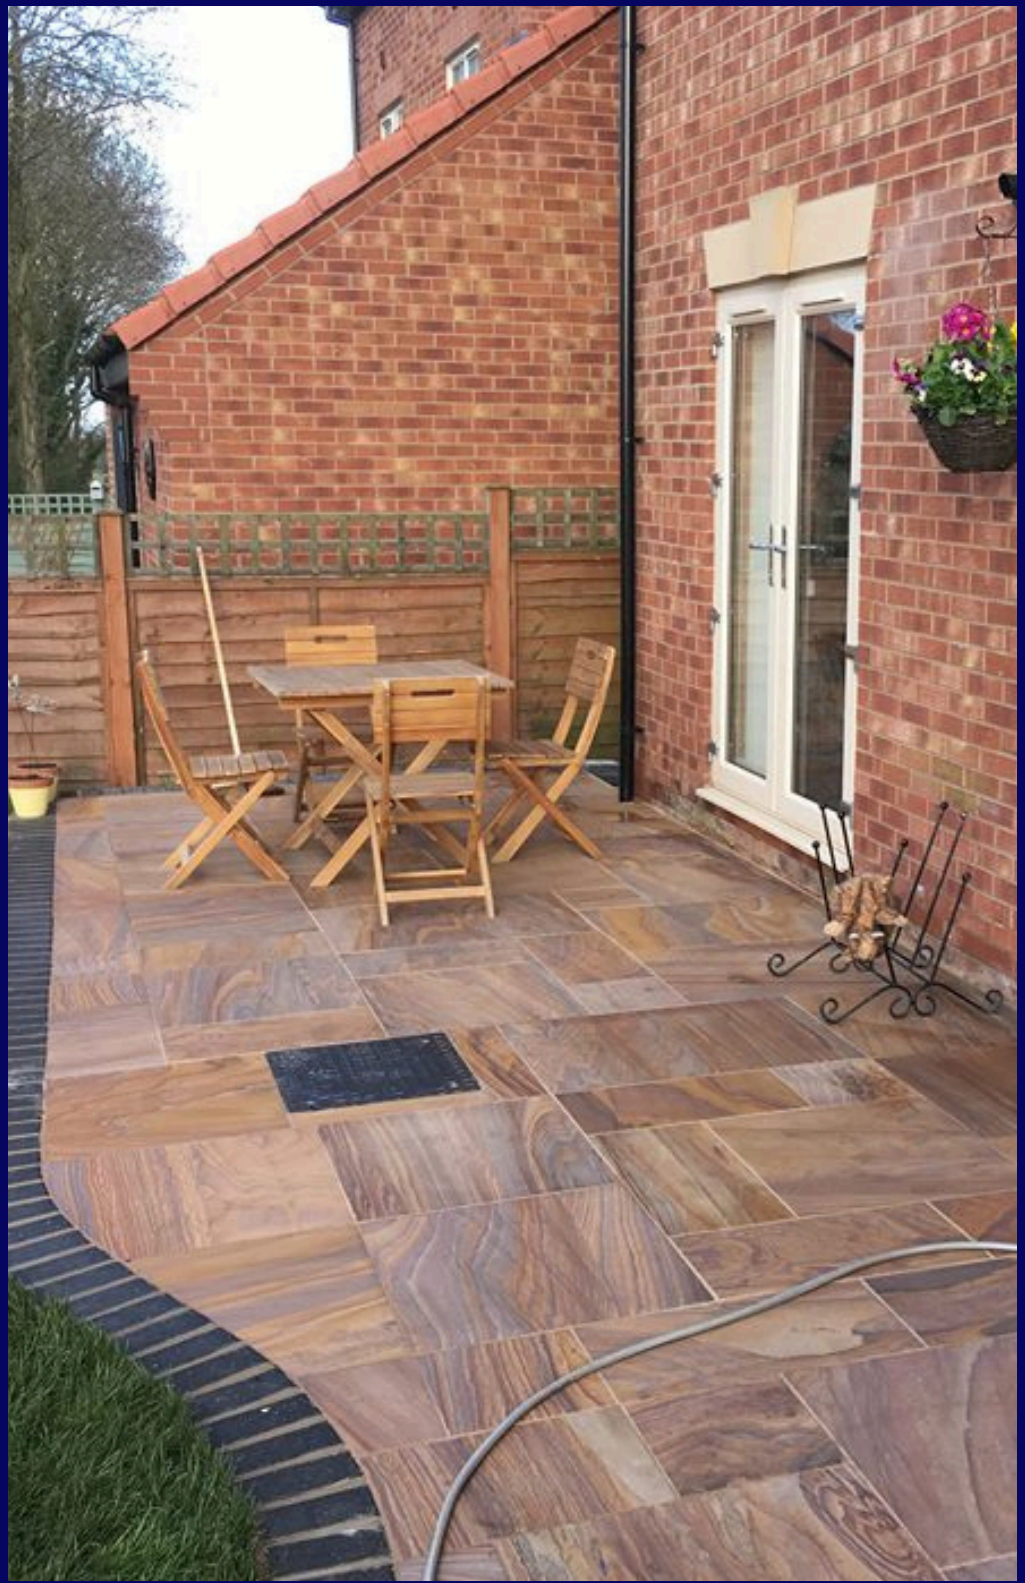

Diamond Sawn straight edges with a honed finish provide a smooth and flat surface creating a contemporary look which is suitable for any surrounding. A honed finish is achieved by polishing & sanding the surface using abrasives.

Rainbow Sawn & Honed 18

Pure Mint White Sawn & Honed 19

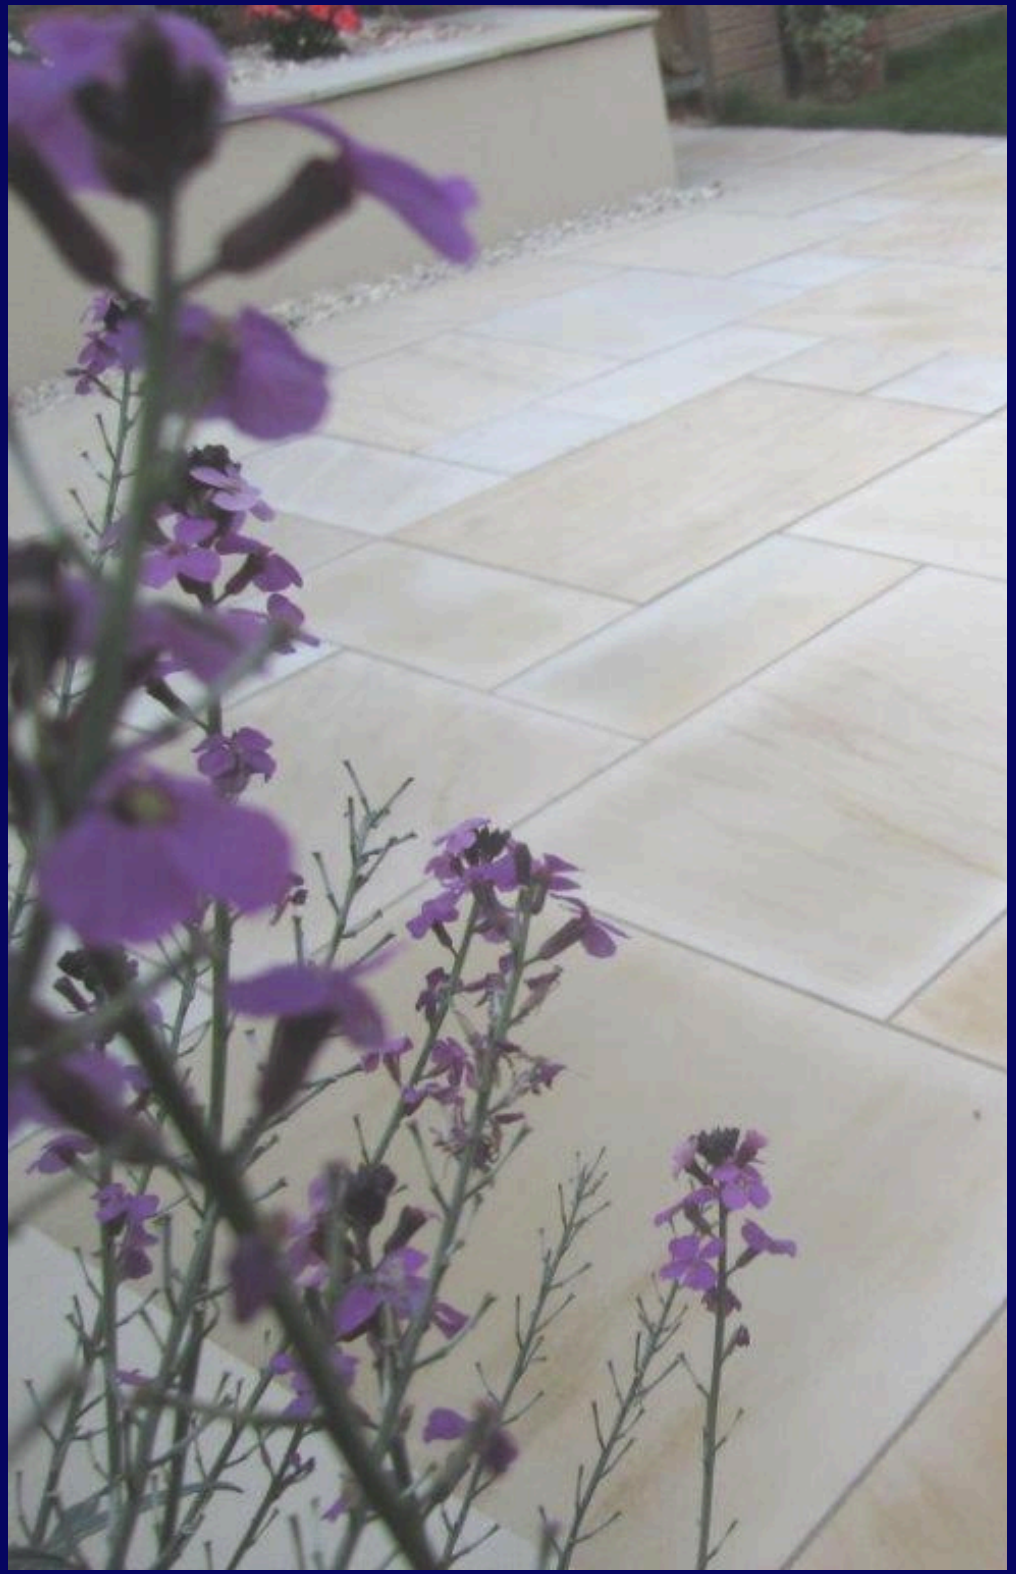

Rainbow Sawn & Honed

This top of the range Indian Sandstone Paving has been diamond sawn then calibrated and honed to leave a rich, vibrant and beautifully coloured appearance with some surface quartzite that sparkles in the sunshine.

Rainbow is a premium grade paving that brings the warmth and charm of quality natural stone into your garden. The paving edges are diamond sawn smooth.

Pure Mint White Sawn & Honed

This top of the range Indian Sandstone Paving has been diamond sawn then calibrated and honed to leave a smooth matt appearance with some surface quartzite that sparkles in the sunshine.
Pure Mint White is a premium grade paving with light pastel shades and subtle veining, which provides a tasteful, refined and elegant backdrop to any garden. If you are looking for the ultimate contemporary patio, then Pure Mint White provides this. The edges are diamond sawn smooth.

Vitrified Porcelain Paving

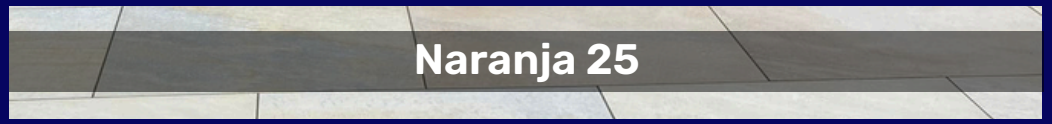

Porcelain paving is manufactured with special clays that are kiln fired to a temperature of 1400 degrees, and then ground and polished to ensure that each tile has sharp, perfect edges. It is an extremely high performance solution to hard paving areas as it remains unchanged over time and is resistant to sun, frost and is non slip (R11 standard)

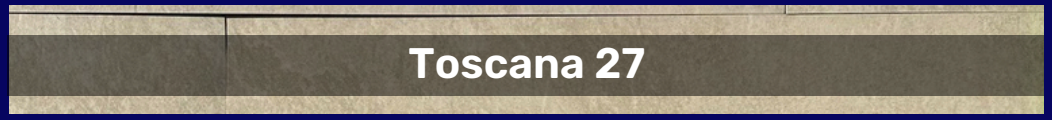

Argento

With it's high anti-slip properties, it is almost impossible to differentiate Argento Porcelain Paving outdoor tiles from natural stone. With the colours, texture and feel that one would expect from such a top quality product as well as it's hardwearing properties, it is hard to find a better paving slab solution.

It has a textured surface for skid resistance, and is frost and UV resistant. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

Nero

Build a breathtaking terrace with Nero Porcelain Paving; its low maintenance qualities in stunning black will enhance your surroundings as you relax in your garden.

In a new design for 2023, Nero is virtually indistinguishable from natural stone, with the colours, texture and feel that one would expect from such a top quality product. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

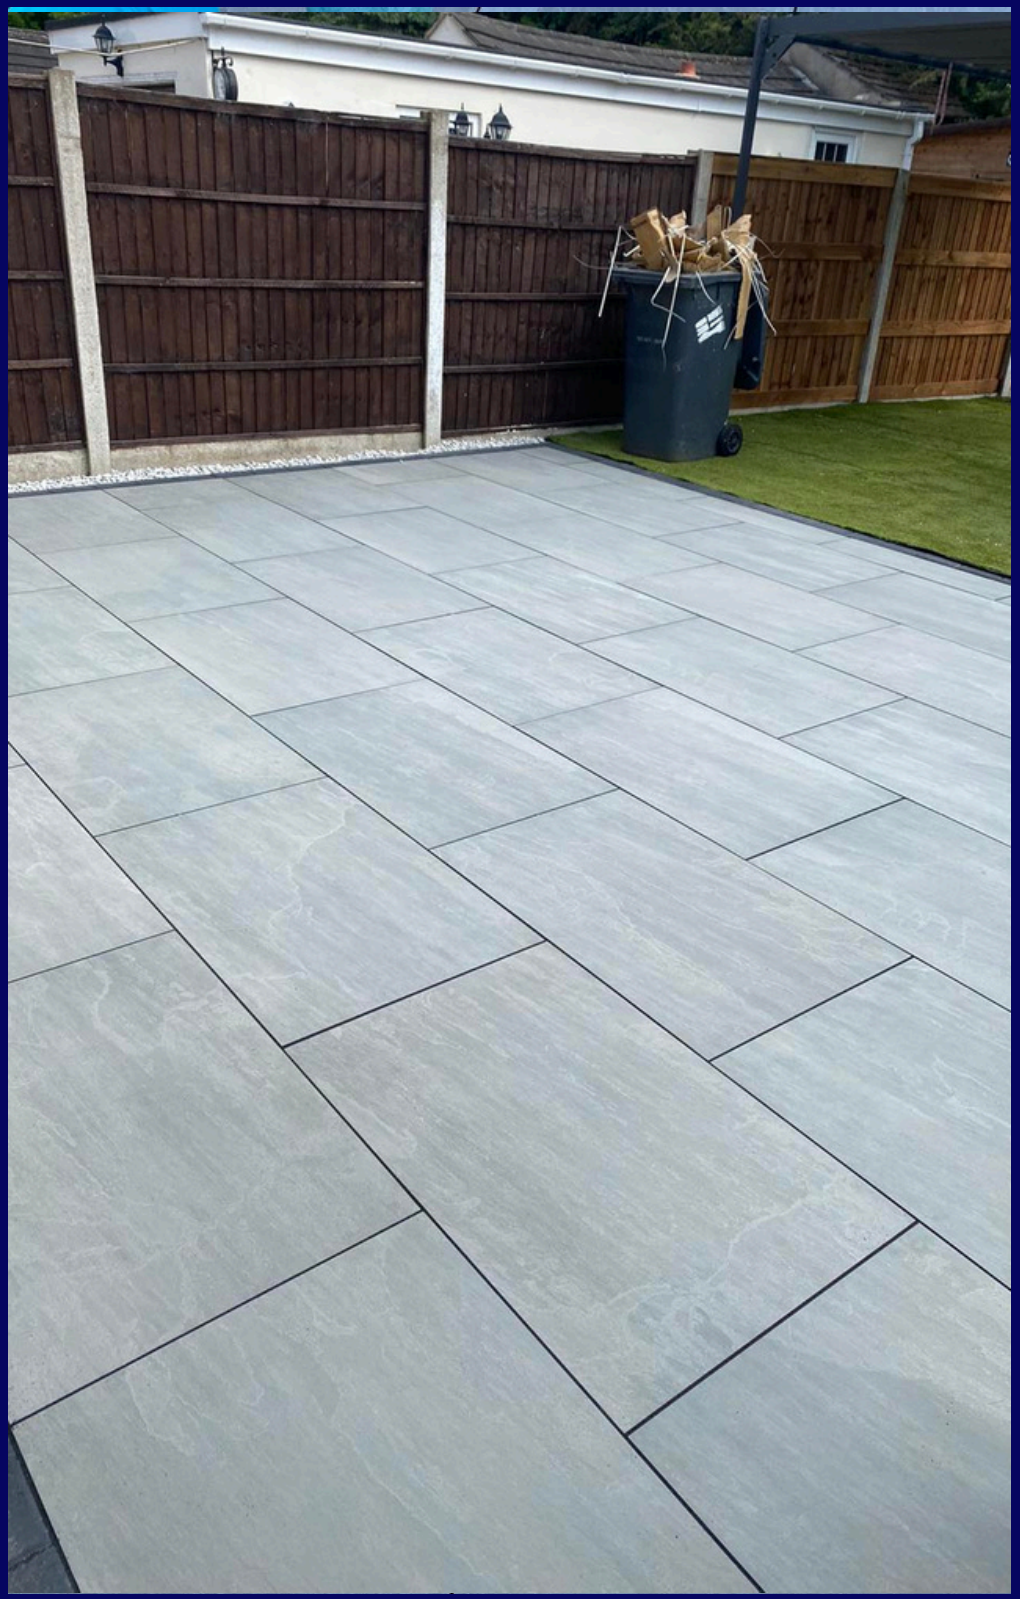

Bianca

Our most popular Porcelain Paver is the beautiful Bianca, with its light tones it's virtually indistinguishable from real natural stone. It really does have the colours, texture and feel of a top quality product. It has a textured surface for skid resistance, and it is both frost and UV resistant. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

Pietra

In a new design for 2023, Pietra porcelain pavers are virtually indistinguishable from natural stone, with the multi toned colours, texture and feel that is identical to silver grey sandstone, They have a textured surface for skid resistance, and also frost and UV resistant. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

Naranja

Create an amazing patio that requires minimal maintenance with this stunning porcelain paver. Naranja paving slabs are practically indiscernible from real natural stone, with beautiful colours, and a texture & feel that one would expect from such a high quality product. A textured surface for skid resistance, and frost and UV resistant.
This exceptional vitrified porcelain fired at 1400°C, then rectified, and is the best quality available in the world today.

Valencia

Valencia a new design for 2024, stunning porcelain pavers that are virtually indistinguishable from natural stone, with the multi toned colours, texture and feel that just looks luxurious. They have a textured surface for skid resistance, and also frost and UV resistant. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

Toscana

New for 2023 Porcelain Paving Toscana is virtually indistinguishable from natural stone, with the colours, texture and feel that one would expect from such a top quality product. Similar to Bianca but a little more whiter in colour. A textured surface for skid resistance, and frost and UV resistant. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

Gris

Antique Gris porcelain pavers are virtually indistinguishable from natural stone, with the colours, texture and feel that one would expect from such a top quality product. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

Supplied in easy to lay size 60x40 with authentic quarried edges

Benefits of porcelain paving include high resistance to:

*Frost and extremely cold weather.

*UV Light - Fade resistant, the colour is locked in for many years to come.

*Ultra low water absorption - Which helps resist stains from spillages, or moisture, which impedes moss and algae, penetrating the surface.

*Withstands high breaking loads, over 1000kg per slab.

*Slip resistance and does not shrink, warp, or rot.

*Made to all EU safety and product standards.

See specifications sheet for further details.

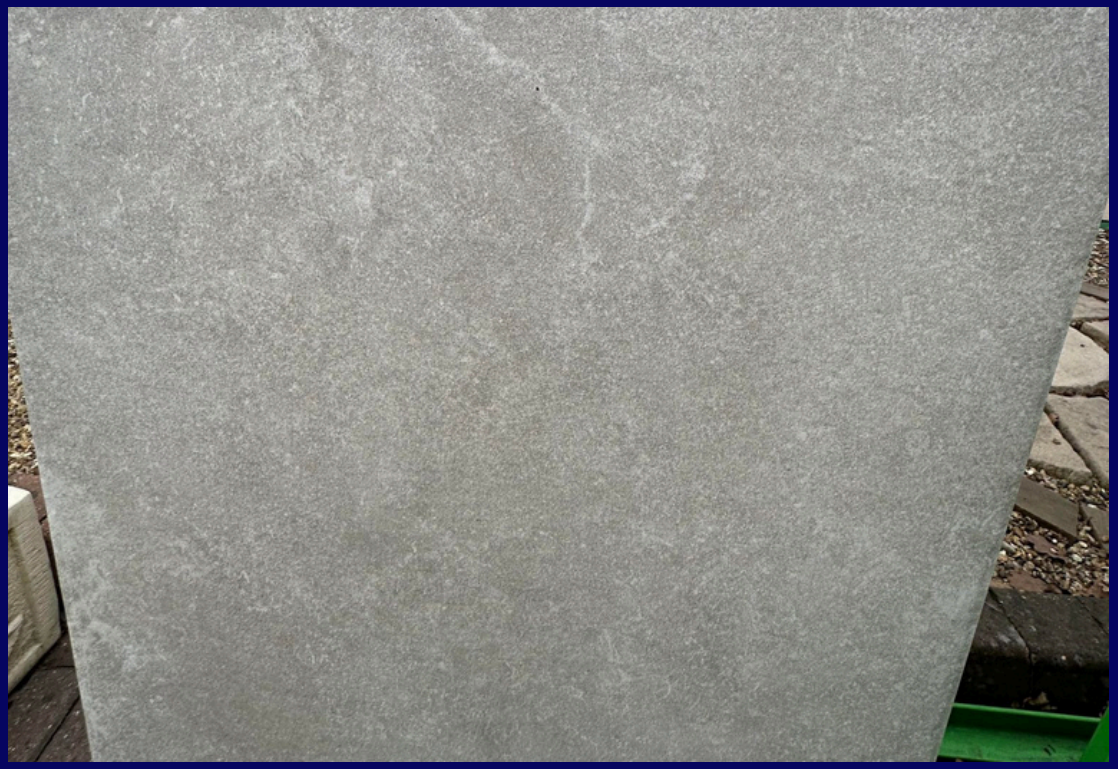

Colore

Colore vitrified porcelain paving slabs in a new design for 2023 which is virtually indistinguishable from natural stone, with multi toned colours of Greys/Buffs/Browns, giving a more traditional feel that looks attractive in any garden. Colore porcelain has a textured surface for skid resistance, and also frost and UV resistant. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

Sabbia & Pepe

Antique Sabbia & Pepe porcelain paving slabs are virtually indistinguishable from French Limestone, with the colours, texture and feel that one would expect from such a top quality product. This exceptional vitrified porcelain is fired at 1400°C, then rectified, and is the best quality available in the world today.

York Gold Garden Gravel 20mm

York Gold Garden Gravel 20mm looks very attractive and is our most popular gravel for gardens. Used around the borders of paved areas and between paving stones, its gold, brown and white stones make it a very hard wearing durable gravel that is perfect for paths, driveways and all landscaping projects.
Delivered to you in bulk bags with hiab/crane offload, which can usually be placed where you need it, in a safe and suitable place. Please be aware of other suppliers' delivery methods such as offloading with a tail lift & pump truck, as they cannot operate on gradients, slopes, up kerbs, or onto gravel, grass etc. This can often result in the customer having to pay a return delivery charge! We guarantee your delivery will have Hiab/crane offload.
On display at our AC showsite.

Artic White MarblePebbles

These stunning white marble Pebbles sparkle in the sunshine and are the purest white available in the UK. A perfect decorative gravel for rockeries, paths, and borders bringing a beautiful bright look to your garden. Delivered to you in bulk bags with hiab/crane offload, which can usually be placed where you need it, in a safe and suitable place. Please be aware of other suppliers terms and conditions when they offload with a tail lift & pump truck, as they cannot operate on gradients, slopes, up kerbs, or onto gravel, grass etc This can often result in the customer having to pay a return delivery charge! We guarantee your delivery will have hiab/crane offload.

Beach Cobbles

These naturally rounded Beach Cobbles are a lovely mix of brown, light pink, white and grey colours which appear pale when dry but change dramatically when wet to reveal the depth of colour. They look stunning in borders, or even whole gardens when a few planters are placed around the area. Beach cobbles are a fish friendly product and ideal for water features and ponds where the colours really stand out when they are wet. They are also perfect for landscaping projects, as a gabion stone or for a garden rockery.

Cotswold Buff - Self Binding Driveway Gravel

Cotswold Buff is currently one of the more popular gravel chippings. It is an angular mellow cream limestone gravel which is perfect for paths and driveways as it compacts with use preventing it from moving around and spreading out. It is often referred to as a "self binding gravel".

This top quality Cotswold Buff is one of the hardest limestones in the UK, and will provide a brighter/warmer feel for any landscaping project, and is perfect for any jobs where low prices are important.

Delivered to you in bulk bags with hiab/crane offload, which can usually be placed where you need it in a safe and suitable place. Please be aware of other suppliers' terms and conditions when they offload with a tail lift & pump truck, as they cannot operate on gradients, slopes, up kerbs, or onto gravel, grass etc. We guarantee your delivery will have hiab/crane offload.

Cumbrian Graphite Slate Chippings 40mm

Cumbrian grey slate chippings are perfect for paths, borders and driveways, and also look good with any surrounding features to enhance all gardens. Sized at 40mm down, these beautiful slate pieces create a contemporary look and the colour turns into a stunning black when wet, making them perfect for ponds and rock pools.

Delivered to you in bulk bags with hiab/crane offload, which can usually be placed where you need it, in a safe and suitable place. Please be aware of other suppliers' terms and conditions when they offload with a tail lift & pump truck, as they cannot operate on gradients, slopes, up kerbs, or onto gravel, grass etc. This can often result in the customer having to pay a return delivery charge! We guarantee your delivery will have hiab/crane offload.

Highland Red Granite Decorative Gravel

The beautiful colour of this Highland red granite is truly unique. A perfect decorative gravel for rockeries, driveways, paths, and borders adding warmth and colour to your garden. Looks even better when wet with a rich colour that can brighten the dullest of areas.

Delivered to you in bulk bags with hiab/crane offload, which can usually be placed where you need it, in a safe and suitable place. Please be aware of other suppliers terms and conditions when they offload with a tail lift & pump truck, as they cannot operate on gradients, slopes, up kerbs, or onto gravel, grass etc This can often result in the customer having to pay a return delivery charge! We guarantee your delivery will have hiab/crane offload.

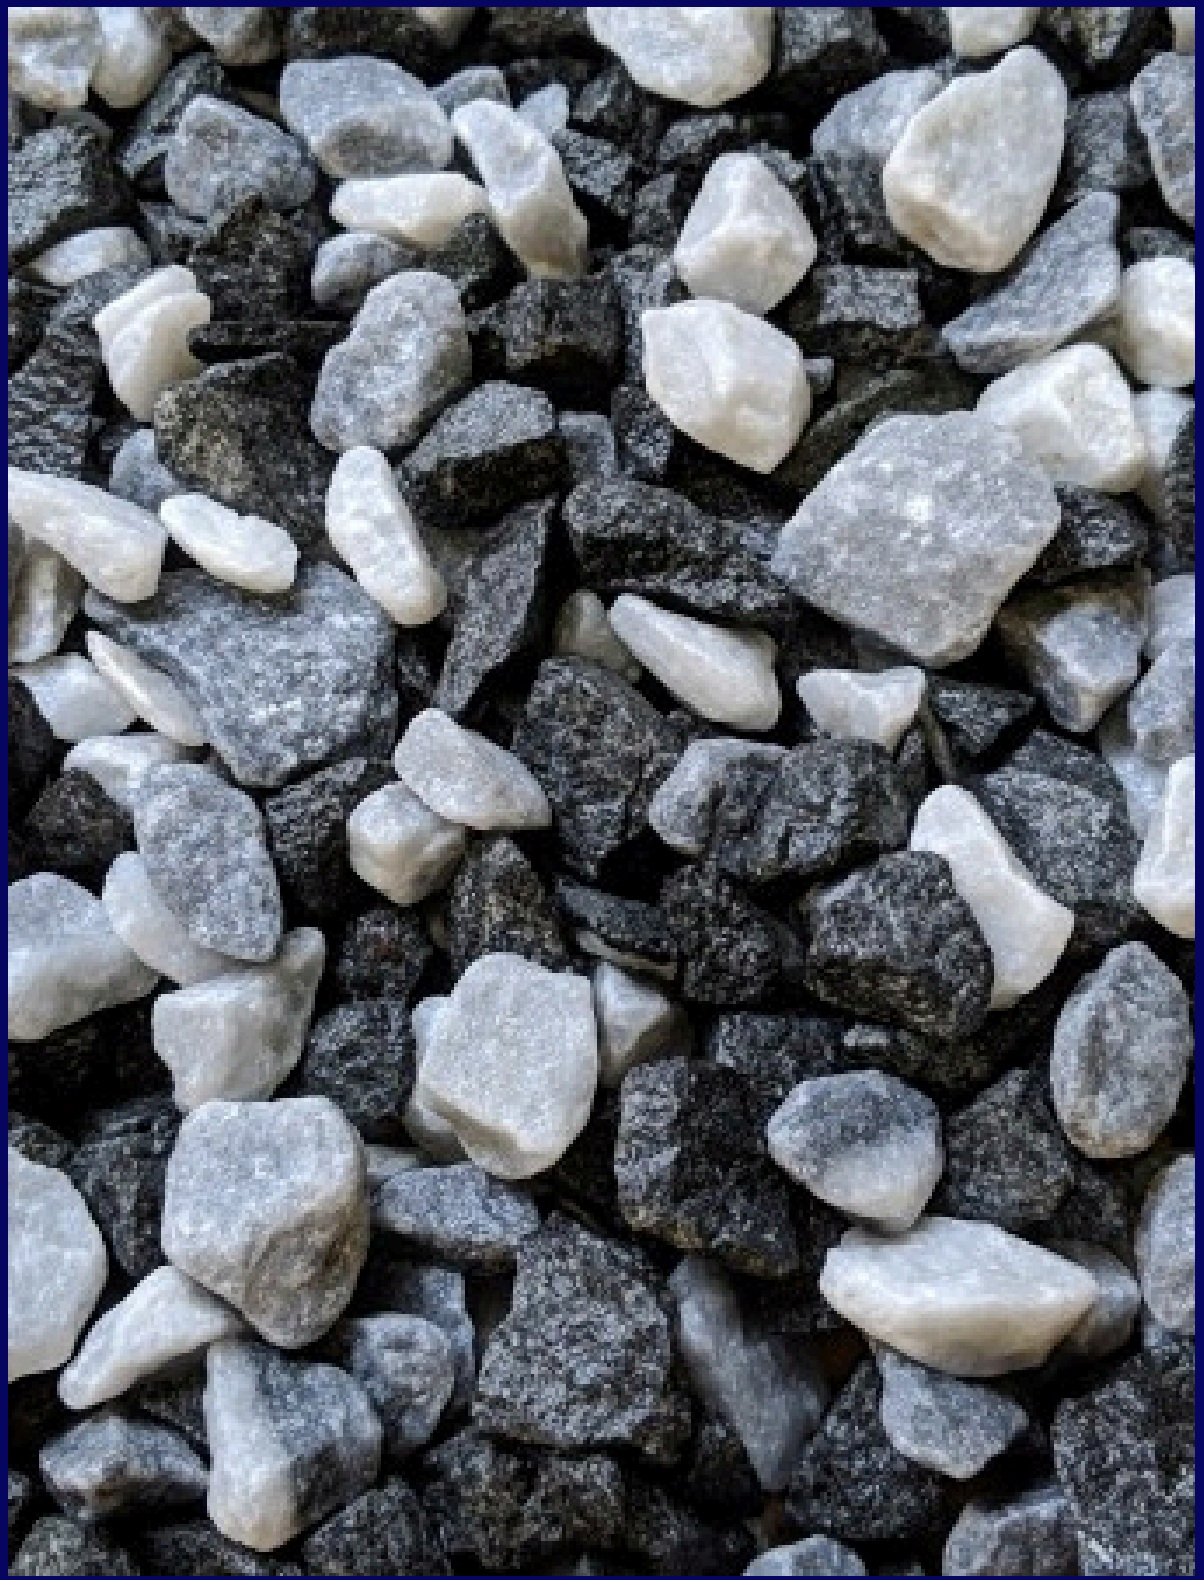

Monmouth Green Granite Decorative Aggregate

Monmouth green granite is an extremely hard wearing and beautiful granite decorative aggregate. Angular pieces make it suitable for driveways, paths, borders, and water features. Stylish and refined, the perfect gravel chipping for your garden.
Delivered to you in bulk bags with hiab/crane offload, which can usually be placed where you need it in a safe and suitable place. Jointing Compounds, Primers & Sealers

Using only trusted brands, with the best reputations supplying you with the best cost effective ways of giving that professional finish to your patio.

Picseal Primer 25kg bag

An ultra-high polymer and fibre modified flexible waterproofing primer with excellent workability and adhesion properties. Applied in one coat for fast application to promote adhesion and control suction on difficult substrates such as porcelain patio slabs, concrete, ceramic tiles, indian sandstone paving slabs or setts.

Picseal Primer 15kg Tub

For ease of use this ultra-high polymer and fibre modified flexible waterproofing primer is now available in a tub. With excellent workability and adhesion properties, and applied in one coat for fast application to promote adhesion and control suction on difficult substrates such as porcelain patio slabs, concrete, ceramic tiles, indian sandstone paving slabs or setts.

Romex Rompox Ultra12.5kg is a simple and effective method of pointing porcelain patios.

Rompox Ultra 12.5kg from Romex is a 1 component jointing compound that is primarily used for paving with tight joints such as porcelain paving (3mm to 5mm). This highly water permeable jointing mortar is very good for DIY use as it is so easy to use.

Colours:

- **Neutral**
- **Stone Grey**
- **Basalt Black**

Can be applied in wet and dry conditions. Make sure paving is wet before applying jointing compound. Minimum jointing gap 3mm.

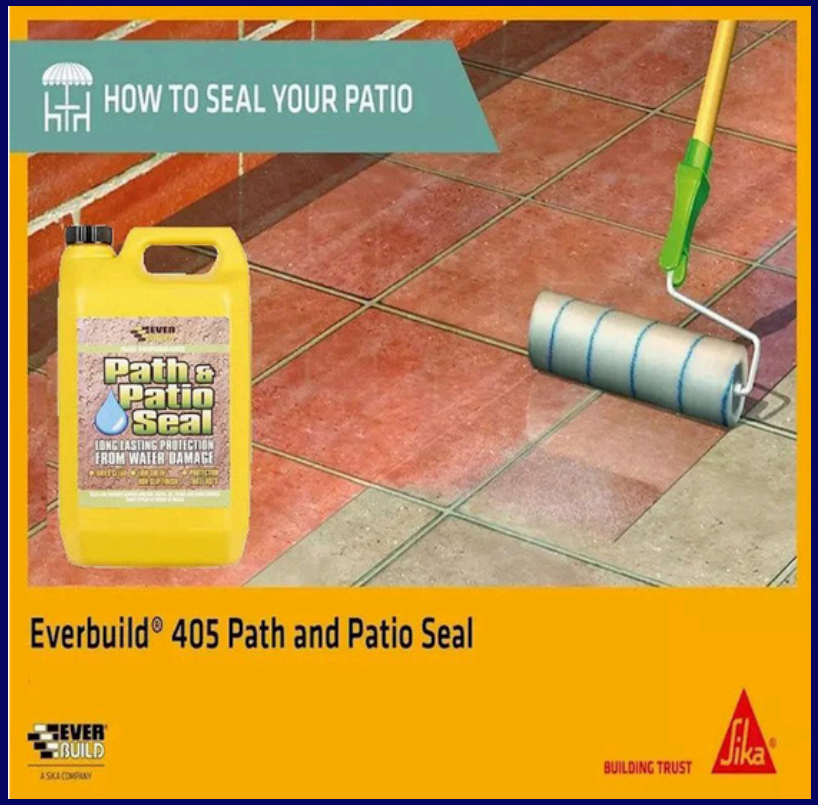

ROMEX®
MODERNE BAUSTOFFE

Romex Rompox Easy Jointing Compound 25kg is simply the best and most effective method of pointing all types of patios. Rompox Easy 25kg from Romex is a 1 component jointing compound that is ideal for all types of paving. This highly water permeable jointing mortar is very good for DIY use as it is so easy to use.

Can be applied in wet and dry conditions. Make sure paving is wet before applying jointing compound. Minimum jointing gap 3mm - Ready to Use - Simple to apply - Ideal for professional or DIY use - Environmentally friendly - All Weather use - Neither rain or frost prevents its use - Perfect finish - No staining or framing - Fast and easy to use - 10-20 times quicker than mortar jointing. Simply dampen the paving, then sweep and brush into the joints.

EVERBUILD PATH & PATIO SEAL

Is an economical solvent free acrylic coating used to seal and protect paths, patios, natural stone, block paving and concrete, from the effects of sunlight, water, oil, petrol, and fungal/mould growth. The milky solution dries to a CLEAR hard wearing water repellent film which gives a low sheen, slip resistant finish which will reduce dirt pick up and faciliate easier cleaning.
It is safer than solvents and is not flammable, and will not harm plants and animals when used as directed.
Seals and protects against sunlight, water, oil, petrol and mould growth.
Dries clear, low sheen, non slip finish and protection that lasts.
Light colour enhancer
Easily applied by brush or roller
Can be applied by standard low pressure garden spray, brush, mop or roller.
Contents 5 litres

Coverage - Will vary dependent upon surface, but as a guide 25 square metres
Ready to use.

- **Can be applied by standard low pressure garden spray, brush, mop or roller.**

Contents 5 litres
Coverage - Will vary dependent upon surface, but as a guide 25 square metres
Ready to use.

Delivery Information

All deliveries within 60 miles will be delivered with our lorry, using hiab to offload gives you endless options to get the goods where you need them - over garden fences etc.
Larger orders can also be delivered nationwide using our lorry with hiab if needed. For smaller orders nationwide, we use a reputable courier using the tail lift (pallet pump truck method)

Hiab Offload 71

Pallet Pump Truck Method 72

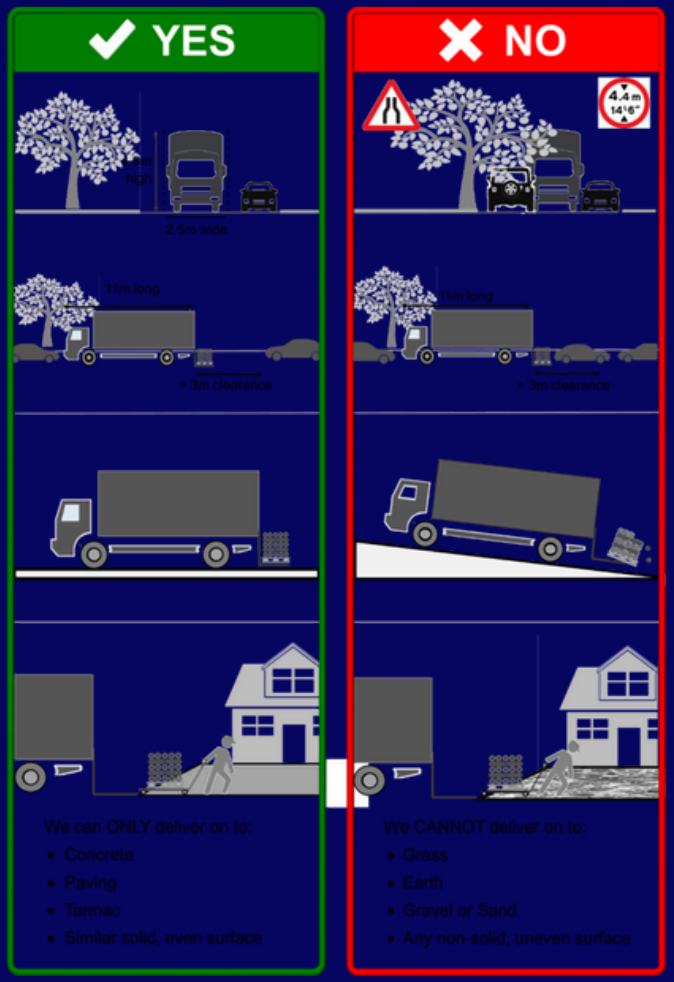

Deliveries normally occur between 7am and 4pm and are normally within 5 working days from payment of order, dependent upon the quantities ordered and the delivery area. Very occasionally deliveries can take a little longer due to stock or location issues.

You will be contacted the day before the delivery of your order. If we cannot contact you, we may still deliver your goods. Please ensure there is adequate space to offload by means of a hiab crane. Your goods will be placed within 4 metres from the delivery vehicle.

We are fully insured to offload to kerbside. If you require the lorry to go onto private property, or lift over walls, hedges etc, we will endeavour to meet your wishes. However, you will be responsible for any damages to the property, including third party damage that may be caused during this process.

Where the distance is more than 60miles, we may use a national courier. These lorries deliver the majority of paving for most suppliers in the UK, and they will probably use the tail lift method. Please ensure you are able to take this type of delivery to kerbside only. The area to be offloaded onto must be flat and large enough, and have adequate access for a lorry. This method of delivery cannot be offloaded onto grass, gravel, loose ground, or on a steep gradient. Most of the national couriers have a driver only policy, so they often will require your assistance when offloading at your property when using the tail lift/pump truck method. Please ensure an able bodied person is available to help on the delivery day. Deliveries that need returning due to access problems will incur a charge to cover this cost, as will delays in offloading when the delivery vehicle arrives. These extra charges will be passed on at cost from the courier. Please inspect the goods as much as is possible for any damage on delivery. If you notice any damage, please sign the delivery note as damaged, this will help recover any losses through their insurance. Otherwise always sign the paperwork from the courier with the phrase - "UNCHECKED FOR DAMAGES" We cannot pursue claims for breakages if the paperwork is not correct.

Deliveries of less than one pack may incur a split pack charge, If you refuse the goods or are unable to accept the goods at the time, a re-delivery, or return charge will be made. These charges are set by the delivery network. Once your delivery date is confirmed we will do our utmost to ensure delivery is on the stated day. But please do not book any tradesmen or materials prior to your delivery, as we cannot be responsible for any costs you may have incurred if, in the unlikely event your delivery is late.

When a next day delivery is specified, the goods must be ordered before 11am, and then they are delivered on the next working day. Although 95% of next day deliveries arrive on time, this service is not guaranteed. In the unlikely event your delivery is late, if you decide not to accept, return delivery charges will apply.

Although we do our utmost to deliver your goods in perfect condition, at the lowest price, please note that it is not possible for any supplier to ship stone from overseas and then deliver to your door without the occasional scuff/scratch marks or sometimes, some small chips to the edges. We cannot be held responsible for every small imperfection.
